Contents:

Pic2Map is tool to gather GPS metadata from picture files and display it in a map.

- Free software: MIT license
- Documentation: <https://pic2map.readthedocs.org>.

## 1.1 Features

- Add location information for pictures under directory to database

```
pic2map add <directory>
```

- Remove location information for pictures under directory from database

```
pic2map remove <directory>
```

- Count how many files have been indexed

```
pic2map count
```

- Launch web server to display map and a marker for each picture

```
pic2map serve
```

---

# Installation

---

At the command line:

```
$ easy_install pic2map
```

Or, if you have virtualenvwrapper installed:

```
$ mkvirtualenv pic2map  
$ pip install pic2map
```

---

### Usage

---

To use Pic2Map in a project:

```
import pic2map
```

---

## Contributing

---

Contributions are welcome, and they are greatly appreciated! Every little bit helps, and credit will always be given. You can contribute in many ways:

### 4.1 Types of Contributions

#### 4.1.1 Report Bugs

Report bugs at <https://github.com/jcollado/pic2map/issues>.

If you are reporting a bug, please include:

- Your operating system name and version.
- Any details about your local setup that might be helpful in troubleshooting.
- Detailed steps to reproduce the bug.

#### 4.1.2 Fix Bugs

Look through the GitHub issues for bugs. Anything tagged with “bug” is open to whoever wants to implement it.

#### 4.1.3 Implement Features

Look through the GitHub issues for features. Anything tagged with “feature” is open to whoever wants to implement it.

#### 4.1.4 Write Documentation

Pic2Map could always use more documentation, whether as part of the official Pic2Map docs, in docstrings, or even on the web in blog posts, articles, and such.

#### 4.1.5 Submit Feedback

The best way to send feedback is to file an issue at <https://github.com/jcollado/pic2map/issues>.

If you are proposing a feature:

- Explain in detail how it would work.
- Keep the scope as narrow as possible, to make it easier to implement.
- Remember that this is a volunteer-driven project, and that contributions are welcome :)

## 4.2 Get Started!

Ready to contribute? Here's how to set up *pic2map* for local development.

1. Fork the *pic2map* repo on GitHub.

2. Clone your fork locally:

```
$ git clone git@github.com:your_name_here/pic2map.git
```

3. Install your local copy into a virtualenv. Assuming you have virtualenvwrapper installed, this is how you set up your fork for local development:

```
$ mkvirtualenv pic2map
$ cd pic2map/
$ python setup.py develop
```

4. Create a branch for local development:

```
$ git checkout -b name-of-your-bugfix-or-feature
```

Now you can make your changes locally.

5. When you're done making changes, check that your changes pass flake8 and the tests, including testing other Python versions with tox:

```
$ flake8 pic2map tests
$ python setup.py test
$ tox
```

To get flake8 and tox, just pip install them into your virtualenv.

6. Commit your changes and push your branch to GitHub:

```
$ git add .
$ git commit -m "Your detailed description of your changes."
$ git push origin name-of-your-bugfix-or-feature
```

7. Submit a pull request through the GitHub website.

## 4.3 Pull Request Guidelines

Before you submit a pull request, check that it meets these guidelines:

1. The pull request should include tests.
2. If the pull request adds functionality, the docs should be updated. Put your new functionality into a function with a docstring, and add the feature to the list in README.rst.
3. The pull request should work for Python 2.6, 2.7, 3.3, and 3.4, and for PyPy. Check [https://travis-ci.org/jcollado/pic2map/pull\\_requests](https://travis-ci.org/jcollado/pic2map/pull_requests) and make sure that the tests pass for all supported Python versions.

## 4.4 Tips

To run a subset of tests:

```
$ python -m unittest tests.test_pic2map
```

---

**Credits**

---

## 5.1 Development Lead

- Javier Collado <jcollado@nowsecure.com>

## 5.2 Contributors

None yet. Why not be the first?

---

**History**

---

---

**0.1.0 (2015-04-23)**

---

- First release on PyPI.

---

## Indices and tables

---

- *genindex*
- *modindex*
- *search*
